...JDF may not be as headline-grabbing as a new press but it’s potentially the most important development in the printing industry since postscript...
Simon Eccles, Electronic Imaging Magazine

Print media is going through a period of technological advances, innovations and new system concepts. IT terms such as MIS, CIM, NGP and SCM are also making their presence felt. The introduction of JDF in 2000 opened up the development of fully integrated process systems which give a high degree of transparency, flexibility, quality and efficiency to its users.

Join us at any of the 3 seminars with Stephan Jaeggi, an internationally recognised expert specialising in PDF and JDF workflows for print production. Come learn more and get a better understanding as to what all the hype around JDF is and just where the advantages and pitfalls lie.

Discussion topics:
Why JDF? How does it work?
Where do I start? Who can help?
Case studies and Discussion sessions with moderators

Dates & times:
Cape Town: 24 July 2006
(Cocktail social in the evening)
Durban: 26 July 2006
(Cocktail social in the evening)
Johannesburg: 28 July 2006
(Cocktail social in the evening sponsored by Kemtek)

Registration starts at 8am. Seminar starts 9am and ends 5pm with a social till late. Book your seat now to avoid disappointment on: www.printingquestions.com
or send an e-mail to:
jdaseminar@printingquestions.com
Cost is R350 per seat of which 10% is donated to YMP to be used for an industry scholarship foundation.

Some of the industry’s biggest suppliers and providers will also explain at what level their products are concerning JDF compatibility and how they can and will play a part towards your ultimate goal...
“Streamlining your workflow”
