Why JDF/JMF?
Why JDF/JMF? - Management Dream

No effort and everthing will work out fine!
Why JDF/JMF? - Real world

- less effort because the base communication and structure is defined.
- customization is still needed
- faster implementation
Why JDF/JMF? - Real world

- less effort because the base communication and structure is defined.
- customization is still needed
- faster implementation

Why still customization?

Job submission to a digitalpress

- JobID
- Substrate
- JobTemplate
- PrintFile
- Stackingparams
- Finishingparams
- ...

"symphony workflow manager® consulting solutions it solutions prepress solutions"
Why still customaziation?

Jobsubmission to a digitalpress

- JobID
- Substrate
- JobTemplate
- PrintFile
- Stackingparams
- Finishingparams
- ...

...
Why still customization?

Summary

- JDF helps to have the connection
- No need for talking with vendors on terminology
- Still the need to understand the process that you want to manage
- Customization yes
- Less effort compared to an individual interface
Connecting Anything to Symphony

successful JDF Integration Projects
